

UPSC FlashCards — iPad Installation Guide

What's in this folder

File	Purpose
index.html	The main app
sw.js	Service worker (enables offline use)
manifest.json	Makes it installable as a home screen app
icon-192.svg	App icon

Option 1 — Host on GitHub Pages (Recommended, Free)

1. Create a free account at github.com
2. Create a new **public** repository, e.g. `upsc-flashcards`
3. Upload all 4 files (`index.html`, `sw.js`, `manifest.json`, `icon-192.svg`) to the repository
4. Go to **Settings** → **Pages** → **Source** → **Deploy from branch (main)**
5. Your app will be live at: `https://YOUR-USERNAME.github.io/upsc-flashcards/`
6. On your iPad: open Safari → go to that URL → tap the **Share** button → **Add to Home Screen**
7. The app icon appears on your home screen and works fully offline!

Option 2 — Host on Netlify (Drag & Drop)

1. Go to netlify.com → sign up free
2. Drag the entire `upsc-flashcards` folder onto the Netlify dashboard
3. Get an instant URL like `https://random-name.netlify.app`

4. On iPad Safari: Share → Add to Home Screen
-

Option 3 — Local Network (no internet needed)

If you have a Mac/PC on the same Wi-Fi as your iPad:

1. Install `npx serve` or Python: `python3 -m http.server 8080` inside the folder
 2. Find your computer's local IP (e.g. 192.168.1.10)
 3. On iPad Safari: visit `http://192.168.1.10:8080`
 4. Use the app (note: PWA install requires HTTPS, so use GitHub Pages for that)
-

How to Prepare Your Excel/CSV File

Excel (.xlsx):

- Column A = Front of card (question / term)
- Column B = Back of card (answer / explanation)
- First row can be a header (Front, Back) — it will be auto-skipped
- No limit on rows (tested with 1000+)

CSV:

- Same structure: front,back
- First row skipped as header

Example:

Front,Back

Who wrote the Indian Constitution?,B.R. Ambedkar chaired the Drafting Committee

What is Article 21?,Right to Life and Personal Liberty

Preamble adopted on,26 November 1949

Features

- 📖 Sequential mode — cards in order

-  Shuffle mode — random order
-  Spaced Repetition — SM-2 algorithm (harder cards shown more often)
-  Still Learning Only — focus on unseen/difficult cards
- ✓/✗ Mark Known or Still Learning after each card
-  Daily streak tracking
-  Configurable daily goal (10–200 cards)
-  Per-deck progress: total / known / learning / % complete
-  All data saved locally in browser (no server, no account)
-  Works offline after first load
-  Swipe right = Known, Swipe left = Still Learning
-  Keyboard: Space = flip, →/← = mark after flip
